HIGH PRESSURE STRAINERS

DSF 990 SZ PD 25 / 40 DN 80-250

Design highlights

- Body and pressure sealing cover made of forged steel
- Different mesh sizes
- Pressure-sealing cover
- Drainage opening in cover

Advantages

- Free of pores and cavities compared to cast steel
- Individually selectable according to degree of soiling and medium
- Increasing external impermeability as operating pressure rises
- Easy to remove filter residue

Version

- Body made of forged steel
- Pressure-sealing cover as per VGB guidelines

Operating data

- Operating pressure up to 680 bar
- Operating temperature up to 650 °C
- Maximum differential pressure between the inlet side and outlet side: 2 bar

Materials

- 1.0460
- 1.4901
- 1.4903
- 1.5415
- 1.6368
- 1.7335
- 1.7383

Screen mesh sizes

- 0.25 mm
- 0.50 mm
- 1.00 mm
- 3.00 mm

Other materials and screen mesh sizes available on request.

Flow media

Depending on the choice of materials, the high pressure strainers can be used for water, steam, gas or other non-aggressive low viscosity liquids.

Applications

In chemical, industrial, process engineering and power plants.

Area of application

Permissible operating pressure [bar(g)] at calculation temperature [°C] ¹⁾

1) Operating temperature = calculation temperature minus temperature surcharge according to the standard codes.

2) For temperatures > 570 °C, stem material 1.4980, seat armoured with Stellite, and high-temperature packing.
